Profile

BI Developer & Data Analyst with 1+ year of hands-on experience turning operational data into trusted reporting. At Inti Data Utama, I design ETL pipelines, model messy operational data, and build Power BI dashboards and KPI reports that teams rely on to make decisions. Previously at Wings Group, I replaced manual reporting with Power BI and Looker Studio dashboards, cutting reporting turnaround by 50%.

Experience

Inti Data Utama · Jakarta

Jun 2026 – Present

Business Intelligence Developer & Analyst

- Build data models and ETL workflows that turn raw operational data into a clean, trusted reporting layer.
- Develop Power BI dashboards and KPI reports, translating stakeholder questions into clear metrics.
- Work with business users to define requirements and metric logic, then validate the numbers before release.

Ayrus Digital Indonesia · Jakarta

Jan 2021 – Present

Founder & Full-Stack Developer

- Founded and run 3-person software studio team, owning strategy, client acquisition, and delivery.
- Lead development of web and Android products on React and Laravel, including the live SaaS products KaselaPOS and AutoJobs.
- Plan scope, schedules, and team workload, keeping client projects at 100% on-time delivery.

PT. Bumi Alam Segar (Wings Group) · Bekasi

Jun 2025 – Jun 2026

Data Administrator

- Replaced manual reporting with Power BI and Looker Studio dashboards, cutting reporting turnaround by 50%.
- Automated manual data entry with AI-assisted workflows, removing a recurring bottleneck and reducing input errors.
- Ran recurring data cleaning and extraction across operational databases, and built a control system for leave and overtime records.
- Analyzed Purchase Request and Engineering Job Order logs to surface efficiency gaps across divisions.

Resi's Project (akuanalis.com) · Bekasi

Jun 2024 – Oct 2024

IT Project Manager

- Led the full SDLC for akuanalis.com, from scoping and planning to production release.
- Set realistic milestones and an agile workflow that kept every deliverable on schedule.
- Built React front-end features with a focus on load speed and responsive UX.

Bangkit Academy led by Google, Tokopedia, Gojek & Traveloka

Aug 2023 – Dec 2023

Mobile Development Participant

- Completed an intensive Android track covering Kotlin, Android Studio, and Flutter.
- Shipped a capstone app with Machine Learning and Cloud Computing teammates, combining a mobile UI, an ML model, and a cloud backend.

GoTo Logistics · Bekasi

Dec 2021 – Apr 2022

Web Development Intern

- Contributed to a large-scale Warehouse Management System, optimizing core features and performance.
- Built end-to-end features with Laravel and React, from database queries to UI.
- Debugged and integrated new features within an established production codebase.

Education

Universitas Singaperbangsa Karawang

2021 – 2026

Bachelor of Informatics Engineering

- Applied data structures and database design to real projects, from full-stack web apps to industrial-scale data management systems.
