Profile

5+ years of experience building responsive web applications using React JS and Laravel. Currently managing and analyzing data at Wings Group, combining logical software engineering with sharp analytics to optimize business efficiency.

Experience

PT. Bumi Alam Segar (Wings Group)

Jan 2025 - Currently

Data Administrator & Analyst

- Automate manual data reporting by creating interactive dashboards (Power BI & Looker Studio), presenting real-time business insights that make it easier for management to make strategic decisions.
- Conducting data cleaning and data retrieval processes periodically, ensuring that all company operational databases are accurate, consistent, and ready to be used for analysis purposes.
- Efficient management of employee data (leave, overtime, etc.) with a neater control system, ensuring high data accuracy and minimizing the risk of input errors.
- Analyze project operational data trends (including Purchase Request & Engineering Job Order logs), transforming the raw data into useful information to evaluate work efficiency between divisions.

AkuAnalisis.com

Project Manager & Frontend Developer (Project-Based)

Jun 2024 - Okt 2024

- Leading the implementation of SDLC (Software Development Life Cycle) from the initial stage to release, ensuring that the entire akuanalisis.com platform development process runs in a structured, efficient manner, and in accordance with industry standards.
- Optimizing team productivity and collaboration through realistic scheduling and workflow management, successfully keeping projects running on time (on-time delivery).
- Actively contribute to frontend development using React JS, ensuring web applications have high performance, responsive interfaces, and optimal user experience (UX).

CodeHive (Software Agency)

Jan 2021 - Currently

Founder & Lead Full-Stack Developer

- Founded and developed CodeHive agency with 3 team members, fully responsible for business strategy, team management, promotion, and service portfolio expansion.
- Act as Lead Developer in executing website and Android application creation projects using a combination of React JS (Frontend) and Laravel (Backend) technologies.
- Manage project scheduling and team workload allocation, ensuring the entire software development timeline runs efficiently and is delivered as agreed with the client.

Bangkit Academy led by Google, GoTo, & Traveloka

Aug 2023 - Des 2023

Android Development Cohort

- Learning industry-standard mobile application development competencies by delving into programming using Android Studio, Kotlin, and Flutter.
- Collaborate in a cross-functional team with colleagues from the Machine Learning and Cloud Computing tracks to design and execute a final project (Capstone Project).
- Successfully built and integrated a ready-to-use application that combines 3 key technology elements: a responsive mobile interface, implementation of artificial intelligence (Machine Learning) models, and a Cloud-based architecture.

GoTo Logistics (GTL)

Dec 2021 - Apr 2022

Web Development Intern

- Contributed to the development of WMS (Warehouse Management System) project, a large-scale warehouse management system, with a focus on optimizing application features and performance.
- Implementing end-to-end technical solutions using a combination of Laravel for backend and database management, and React JS for building responsive (frontend) interfaces.
- Collaborate in a dynamic engineering environment, adapt to industry-standard code architectures, and assist teams in debugging and integrating new features.

Education

Universitas Singaperbangsa Karawang

2021 - Currently

Informatic Engineering (Final Semester)

- Implementing programming theory and data structures into real projects, including the development of web applications (Full-Stack) and industrial-scale data management systems.
- GPA : 3,6 / 4,0

Skills

- | | |
|---------------------------------|------------------|
| • Data Analysis & Visualization | • React JS |
| • Power BI | • Laravel |
| • Looker Studio | • Android Studio |
| • Postgresql / MySQL | • Git |

Certificate

- Junior Web Developer | Badan Nasional Sertifikasi Profesi (BNSP) – Nov 2021
- Junior Web Developer | Badan Nasional Sertifikasi Profesi (BNSP) – Aug 2023
- Junior Web Developer (Vocational School Graduate Academy) | Digital Talent Scholarship by Kominfo – Agu 2023
- Belajar Dasar Git dengan GitHub | Dicoding Indonesia – Agu 2023
- Laravel Course | Harisenin.com – Mei 2023
- Problem Solving (Basic) | HackerRank – Jun 2023
- Fundamental SQL | DQLab – Sep 2021
- Fundamental Web Programmer | Hacktiv8 Indonesia – Nov 2021
